PROGRESS NEMARANZHE

PROFESSIONAL SUMMARY

• Final-year Information Technologh student deeply passionate about technology and innovation. Possesses a robust proficiency in programming languages such as Python, C#, Java, and SQL, with a demonstrated track record in developing practical software solutions. I am highly motivated and inquisitive, aiming to apply my skills and knowledge in a dynamic IT environment. My goal is to contribute to impactful projects, collaborate with like-minded professionals, and foster continuous learning and growth.

WORK HISTORY

Academic Projects
Chat Application
Description: Developed a basic messaging program as part of a group project, enabling users to send and receive messages in real-time.
Technologies Used: .NET Framework, Visual Studio, C#, ASP.NET, WCF, HTML, CSS, JavaScript

• Collaborated with team members to design and develop the application.
• Focused on back-end development using C# and ASP.NET, implementing communication features with WCF.
• Assisted in designing the front-end interface with HTML and CSS.
• Managed user authentication and data storage.
• Successfully developed and deployed a fully functional chat application, gaining hands-on experience with the .NET Framework and communication technologies.
• Enhanced teamwork and project management skills through collaborative development.

Information Systems Project
Veterinary Clinic Information System
Description: Developed an information system for a veterinary clinic to manage patient records, appointments, and billing.
Technologies Used: .NET, C#, SQL Server, HTML, CSS, JavaScript

• Designed and implemented back-end using .NET and C#
• Developed and managed SQL Server database
• Created front-end with HTML, CSS, and JavaScript
• Implemented Microsoft SQL server to handle patient records.
• Gained comprehensive experience in full-stack development and Agile practices
• Achieved high academic recognition for project
